

Research Opportunities for Research Postgraduate Students (PhD, MPhil) in the Division of Family Medicine and Primary Care

The Division of Family Medicine and Primary Care aims to provide academic excellences by developing research in four major areas:

1. **Evaluation of Primary Care and Health Services** including patients' satisfaction, patient-doctor relationship, evaluate and validate instruments for quality assessment of primary services in Hong Kong, China and the rest of Asia.
2. **Chronic Disease and Multimorbidity** including screening, prevention and complex intervention for patients with multiple chronic conditions in primary care setting.
3. **Mental Health issues** including health promotion, screening and psychosocial intervention such as mindfulness in community and in primary care setting.
4. **Cancer Screening** including knowledge transfer of most up-to-date medical evidence-based practice of preventive care, risk-based screening and implement population-based screening programmes in primary care setting.
