

Certificate Course in Occupational Health Practice 2016

JC School of Public Health and Primary Care, The Chinese University of Hong Kong

GOAL & OBJECTIVES:

OENV5002 is a foundation course for students intending to study in any discipline of occupational health sciences, by covering key principles and concept in practising occupational health and hygiene. It aims at improving competencies in Occupational Health Practice at an introductory to medium level.

After going through the lectures, demonstrations and case analyses, participants will be able to acquire necessary occupational health competence to:

1. identify, assess and manage occupational hazards in healthcare settings
2. identify, evaluate, prevent and manage common occupational illnesses and injuries
3. plan and evaluate intervention and occupational rehabilitation programs

TARGET PARTICIPANTS:

This advanced training programme is targeting on the healthcare and safety professionals who are responsible for the healthcare, health quality and insurance, and safety in hospitals/clinics, companies, and governmental agencies, as well as any person who is interested in occupational health practice.
